This conservation practice is an asset to your farm or ranch. This practice will need periodic operation and maintenance to maintain satisfactory performance. The life of this practice or system is at least 10 years. The life of this practice can be assured or extended by thorough and timely operation and maintenance. Here are some recommendations to help you develop a good operation and maintenance program.

GENERAL RECOMMENDATIONS

Maintain all fences in good condition to exclude livestock from collection and storage systems.

Maintain covers and seals to prevent insects and rodents from contact with the water.

Maintain all screens and filters in good working condition; replace if damaged.

Exercise care to prevent herbicides, insecticides, fertilizers, and other potential pollutants from contaminating the water.

Protect system and components from damage by freezing.

Immediately repair any damage from vandalism, vehicles or livestock.

Contact your local Natural Resources Conservation Service for any additional technical assistance that you might need for implementation of this operation and maintenance plan for your structure.

Specific Recommendations For Your Installation

Contact your local Natural Resources Conservation Service for any additional technical assistance that you might need for implementation of this operation and maintenance plan for your structure.
